SGTA12

MANJIRI

March 22, 2005

- You can create a slide show broken up into sections by using the $\#$ and $\#\#$ heading tags
- You can also create a new slide without a header using a horizontal rule (---).

Section 1

In the morning

Getting up

1. Turn off alarm
2. Get out of bed

## Breakfast

- Eat eggs
- Drink coffee

Section 2

In the evening

Dinner

- Eat spaghetti
- Drink wine

cars

Going to sleep

- Get in bed
- Count sheep

Images

Figure 2: RMarkdown cheatsheet

Tables

- Tables could be generated using kable() or kbl(). Short table can also be created within R by using tibble::tribble.

Table 1: kable example

First Header	Second Header
Content Cell 1	Content Cell 2
Content Cell 3	Content Cell 4

- Notice that kableExtra may not be able to load all LATEX packages as in a pdf_document/pdf_document2 output format and you may have to add that in yourselves.

Mathematics

- Standalone equation.

$$\frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

- In an aligned environment.

$$e^{i\pi} + 1 = 0$$

$$\frac{1}{\sigma\sqrt{2\pi}} \int_{-\infty}^{\infty} e^{-\frac{1}{2}(x-\mu)^2/\sigma^2} \, \mathrm{d}x = 1$$

$$\int_{1}^{\sqrt[3]{3}} z^2 \, \mathrm{d}z \times \cos\left(\frac{3\pi}{9}\right) = \log\left(\sqrt[3]{e}\right)$$
